

# Map of the Knot Theory course:

a biased, not fully faithful geometric representation of mathematics

arrows indicate how to take the quotient

by axel sarlin and innokentij zotov

updated 2017-02-08 21:10

\* the gray shape is supposed to loosely represent various aspects of geometry

\*\* many physical subjects, such as gauge theory, 4-manifolds and relativity could be placed around here

\*\*\* the n-lab perspective on modern physics would end up in here somewhere
